Sheet 3. C, D & E (details to General Sketch).

Additional re buildings G & H
Connecting doors between all cells are locked and bolted; doors leading to corridor can only be opened by guards on the corridor side. Cell windows have iron grills. Air vents in cells are usually seven inches square. There are no toilet or washing installations in the cells. A metal bucket serves as a toilet in each cell; prisoners are required to have their own metal wash basin, soap, enamel cup, towels etc. Cold water is carried in large containers to all cell quarters by prisoners each morning and evening. Usually cold water, in severe cold weather sometimes warm water. Prisoners are escorted once a month to building "E" for a warm bath.

Cells 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11 for 6 people, sometimes - 9. Cell 11 for women.
Cells 12, 13, 14, 15, 16 each for 12 persons, sometimes - 16 or 18 (these cells are made from small ones and each has 2 doors, but one door is always closed).

Cells 1-11 are $9\frac{1}{2}'' \times 8\frac{1}{6}''$ (about)
12-16 - $19\frac{1}{8}'' \times 8\frac{1}{6}''$ - "

Passage from North & South sides is closed by doors (bottom part wooden over upper half - glass).

office - office for this barracks.

A.B. - living room for staff.

Cells 4, 5, 6, 7, 8, 13, 14 for 6 people
- 2, 3, 15, 16, 17, 18, 19 12 people
- 11, 12 for 2 people
- 9, 10 for 1 person.

Entrance closed by a door similar to that one as in G.

are both all one story grey brick buildings with tile roofs.

Over the corridor are openings for fresh air (7m each).

Prisoners are heated during the winter by small coal stoves.

Each big cell has 4 small stoves and 2 holes in the ceiling for ventilation.

Heating time 15 December up to 31st March.

Cold water supply (tub)
